

Deepfake Audio Detection & Response

Fully Managed Deepfake Forensic Analysis and Detection service. AI modelling for Deepfake audio detection, monitoring, alerting and digital forensics.

Who We Are

We combat Deepfake with fully managed offerings. Our solutions integrate easily with your existing technology. Our AI detection modelling detects deepfake audio with a 97% confidence score.

Our cutting-edge AI solutions are designed to Detect and Respond to Deepfake Cybersecurity attacks and incidents.

Available for Early Release: <https://breacher.ai/deepbreach/>

Why Choose Us

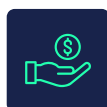

Deep Industry Experience

Industry leading AI Detection Modelling for Deepfake Audio with High Confidence Scoring.

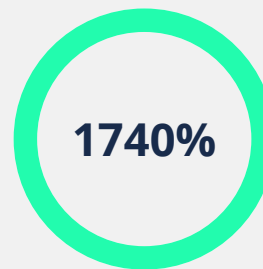

Cybersecurity Expertise

We are committed to providing innovative and cutting edge solutions for the Cybersecurity community.

Rapid Value Creation

Our solutions integrate with your tech via API, no need to rip and replace or deploy additional tools.

Increase in Deepfake Attacks in North America

Our Services

Deepfake Detection

- Deepfake Audio Detection.
- Advanced AI Modelling Analysis.
- Deepfake Heat Map Scoring.
- 97% Confidence Scoring.

Deepfake Response

- Digital Forensics & Evidence
- 3rd Party Attestation.
- Investigative Services
- Technical Support & Handling

Deepfake Detection & Response

- Integrates With Existing Tech.
- Fully Managed Detection & Alerting.
- Deepfake Incident Response.
- Managed Deepfake Forensics.
